Jason Davey's Core Skills & Competencies

Conversation Design & AI Orchestration

- **Conversational design and multi-agent orchestration** - Expert in creating seamless, natural dialogue flows and coordinating multiple AI systems
- **AI UX strategy and service design thinking** - Strategic approach to user experience in AI-powered environments

Technical Proficiency

- **Voiceflow** - Advanced conversation design and prototyping
- **Figma** - UI/UX design and collaborative design workflows
- **Chronicle** - Project management and documentation
- **Miro** - Visual collaboration and design thinking workshops

- • **Pickaxe** - AI tool development and deployment

Design Philosophy

- • **Empathy-led, outcome-driven behavioural design** - Focuses on understanding user needs and driving measurable results
- • **Human-centered approach** - Prioritizes user experience and accessibility in all design decisions

Enterprise Experience

- • **HR/L&D systems deployment** - Proven track record in enterprise human resources and learning & development solutions
- • **SME decision-systems** - Experience building decision-support systems for small and medium enterprises

These competencies make Jason particularly well-suited for conversation design roles that require both technical expertise and deep understanding of human behavior and business outcomes.

Would you like to explore his **project portfolio** to see these skills in action, review his **career history**, or examine his **Virtual Assistant Analysis** of this very conversation system?
